

# Attention Citizens of Taylor, Texas!!

## Taxpayer's Enemy Number One- Gregg Abbott and the Republican Party

Gregg Abbott and the Republican Party care more for Korea and Samsung than taxpayers and homeowners in Taylor ISD.

### Fraud

Taylor ISD Administration signs (10) Chapter 313 Agreements for tax abatements that will relieve Samsung of \$87,000,000.00 of annual school property taxes revenue that could have flowed into the school district funding source.

**Federal Government gives Samsung \$6.4 billion dollars of taxpayer money to Samsung to help build the projected \$173,000,000,000.00 chip plant!**

### Corruption

Taylor ISD asks taxpayers to approve a bond referendum for \$147,000,000.00 on the November 4<sup>th</sup> ballot after giving away millions of available annual tax revenue. The district sold out the taxpayers!

### Big Business

**Gregg Abbott gives Samsung \$250 million dollars of taxpayer money from the State of Texas while asking taxpayers in Taylor for \$147,000,000.00 for school bonds!**

### Crooked Politicians

The Samsung chip plant deal forced on the taxpayers of Taylor, Texas is one of the biggest examples of fraud and corruption against taxpayers in the United States of Americas. Taxpayers are not letting this go unchallenged and the work is underway to expose one of the biggest examples of violations of the rights of citizens granted in the US Constitution. Taxpayers in Texas have started to band together across the state and bring the fight right to the front door of Austin bureaucrats who care more about foreign business owners than they do about their own constituents. Legal counsel supporting taxpayers in Washington DC to regarding federal criminal complaints filed with the DOJ, FBI and SEC regarding multiple school districts are at work now. School district officials and administration have sold out taxpayers and provided lucrative tax breaks for Solar and Wind Farm projects in multiple north central and south Texas. Twenty-nine Chapter 313 Agreements executed by school officials without voter approval have forfeited millions of available tax dollars from local sources for the ten-year abatement periods agreed to in the agreements. These contracts work just like the Taylor ISD agreements for the Samsung chip plant with a total buildout cost of \$173,000,000,000.00 dollars when completed sometime in 2042. The money that should have flowed into the school districts would help alleviate the property tax burdens on homeowners and bring the needed funds into school districts.

Austin bureaucrats with close ties and financial interests with big business have started a war with taxpayers in Texas they are not prepared for. And all restraints are removed, and taxpayers are **in it to win it** at all costs. The Republican Party will no longer be the favored party after it is exposed for fraud and corruption. The imminent collapse of the bond market related to fraudulent school bonds hidden from taxpayers for decades is now being exposed for all to see. Politicians and elected leaders in Austin have failed for decades and have no

solution to the school financing problems. The financial markets will take over as the inevitable starts to unfold over the next several months. Smart investors are starting to pull funds from accounts tied to the fraudulent bonds before the SEC steps in and takes over to try and manage the fallout soon coming to Texas.

Taxpayers in Texas who want to protect their homes and property must join up and get involved to stop the fraud and corruption and restore sanity to what goes on in Texas. Along with the federal complaints submitted in February and March legal counsel in Washington DC has notified the SEC in early August and all the supporting documentation has been made available to officials and investigators. The work that is underway to expose fraud and corruption regarding lucrative energy contracts started in 2006. In 2016 one of the plaintiffs started another effort and pathway to court regarding property tax fraud related to property valuations and artificially inflated property values to fund fraudulent annual school budgets and bond referendums. In August of 2024, these two efforts joined together with several other individuals. These efforts have resulted in tens of thousands of taxpayers in Texas working in unison for the past thirteen months.

Taxpayers can learn more by watching the **Real Estate Mindset** YouTube channel, **Texas Transparency Project**, and **Eliminate Property Tax** on Facebook. Taxpayers can also find all the case documents and supporting information at **Commonsenselaw.org** and **Mockingbirdproperties.com/dcad**

There is no other matter facing the citizens of Texas and the United States more important than this issue and problem. The futures and lives of every citizen is founded on the principle that every hard-working American can own a piece of the American dream and vision the founding fathers had for ALL generations that would follow them after this nation was formed and created. During the 1770's tens of thousands of colonist united and joined together, White, Black, European, and even some native Americans and pledged their lives, liberties, and wealth to fight the British Empire. This is a call to arms for all patriots to unite and be willing to take whatever measures necessary to stop the fraud, corruption, government overreach and oppression of the rights of citizens enumerated in the US Constitution.

Everyone must get involved now. The financial debt clock in Texas is just as bad as that of the federal government. If immediate action is not taken to prevent the piling up of additional debt(s) of any kind including school bonds there will not be much reason to care very soon. The stakes are high, and many are going to be impacted financially. The most important thing at this time is that taxpayers and homeowners will no longer be subjected to excessive taxation and jeopardy of losing their homes. It is one thing to be financially bankrupt and broke, but it is even worse to not have money and not have a home.

Everyone's help and hard work is needed to turn things around. What is happening to thousands of people every day has to stop. The future of our children and grandchildren will be impacted by the actions or refusal to take action by every citizen of this state. Do not wake up one day ten years from now and regret not taking a stand today.

Sincerely,

Jeff Mashburn-Fellow Citizen and Patriot
