

# Attention Taxpayers of Texas!

The involvement of taxpayers in Texas is crucial to the financial future and survivability of every family in Texas today. The out-of-control cost of spending by local government has and will continue to bankrupt the lives of completely innocent people if taxpayers do not stand up and fight back. On May 3<sup>rd</sup> voters across the state of Texas went to the polls to vote on bond referendums put forth by school districts. The majority of these bond measures will put thousands of homeowners and taxpayers at risk of losing their homes. In far north central Texas elderly and single parent homeowners have been put in harms way of losing their homes due to very large and lucrative bond measures passed by voters.

The system of funding education in Texas is and has been unconstitutional for decades. Many homeowners and taxpayers have been the victims of corrupt and immoral practices by school districts to get whatever they want regardless of the pain and suffering they inflict on innocent citizens and the elderly. Due to the complete disregard by elected leaders in Austin to be fair and uniform things will become very dangerous for many in the future. Taxpayers and homeowners with their backs to the walls will use and take every means needed to defend their homes. Many homeowners are banding together to fight back against corruption and racketeering by school officials. No one has the right or authority to take someone's home from them in this state or nation. The reckless and immoral actions by school officials will not go unpunished or unchecked at whatever means are necessary.

## ***How Much Is Your Vote Worth?***

On May 3<sup>rd</sup> voters in Itasca, Texas voted down a **\$34,000,000.00** dollar bond referendum by just **TEN VOTES!** A total of 514 votes were cast. There were 252 votes in favor and 262 votes against the measure. It was the highest voter turnout ever for a school bond and both sides worked hard to ensure a victory. The tight race revealed the importance of every voter's voice being heard. Each of the ten votes against the measure is worth **\$3.4 million dollars each!** School superintendents and board members have no business in regard to what a citizen and taxpayer can and cannot afford at home. The very notion that individuals elected to serve the public have a right to ruin the lives of those living within the limits of school districts is nothing short of arrogance and a narcissist mentality. These attitudes and views will not be successful in Texas. Taxpayers and homeowners are joining forces to protect their homes and financial well being and will put everything online the line to defend them.
